This Protest is filed on behalf of Raymond Trepanier:

As a citizen who enjoys the Wayne National Forest and has enjoyed going to the Wayne for recreational purposes, I am very interested in this National Forest.

II. Statement of Reasons as to Why the Proposed Lease Sale Is Unlawful:

BLM's proposed decision to lease the parcels listed above is substantively and procedurally flawed for the reasons discussed below:

There has been no Environmental Impact Statement, endangered animals in the area not properly considered, methane is more potent than CO2 in contributing to short term climate change, increased seismic activity in the area is unacceptable, its proximity to the river and in flood territory make fracking here unacceptable, and there ARE better alternatives for our energy needs
